Set Theory Venn Diagrams

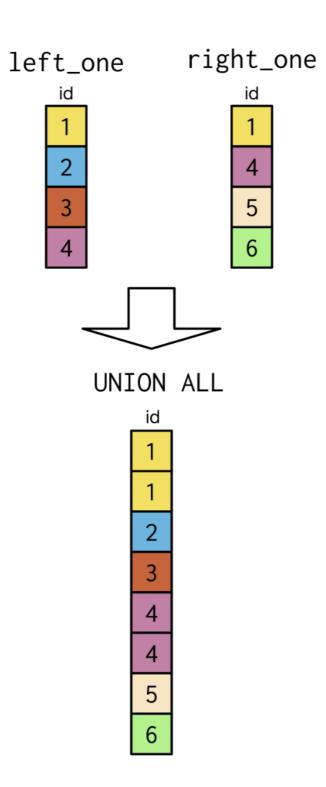

monarchs table

```
SELECT *
FROM monarchs;
```

All prime ministers and monarchs

```
SELECT prime_minister AS leader, country
FROM prime_ministers
UNION
SELECT monarch, country
FROM monarchs
ORDER BY country;
```

Resulting table from UNION

```
leader
                     country
Malcolm Turnbull | Australia |
Hassanal Bolkiah | Brunei
Sherif Ismail
                    | Egypt
Jack Guy Lafontant | Haiti
Narendra Modi
                    l India
Harald V
                    | Norway
Erna Solberg | Norway
Qaboos bin Said al Said |
                     Oman
Antonio Costa
            | Portugal
Mariano Rajoy
                    | Spain
Felipe VI
                    | Spain
Nguyen Xuan Phuc
                    | Vietnam
```

UNION ALL with leaders

```
SELECT prime_minister AS leader, country
FROM prime_ministers
UNION ALL
SELECT monarch, country
FROM monarchs
ORDER BY country
LIMIT 10;
```

```
leader
                        country
Malcolm Turnbull
                        | Australia |

INTERSECT diagram and SQL code

```
SELECT id
FROM left_one
INTERSECT
SELECT id
FROM right_one;
```

Prime minister and president countries

```
SELECT country
FROM prime_ministers
INTERSECT
SELECT country
FROM presidents;
```

```
+-----+
| country |
|-----|
| Portugal |
| Vietnam |
| Haiti |
| Egypt |
```

INTERSECT on two fields

```
SELECT country, prime_minister AS leader
FROM prime_ministers
INTERSECT
SELECT country, president
FROM presidents;
```

```
+----+
| country | leader |
|-----+
+-----|
```

Let's practice!

JOINING DATA IN SQL

EXCEPTional

JOINING DATA IN SQL

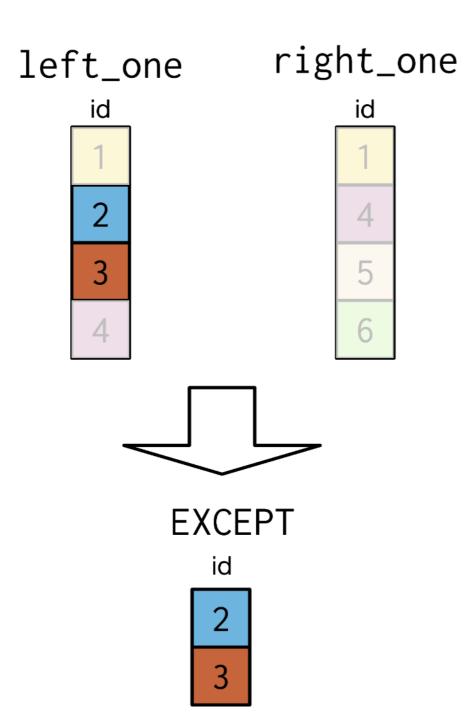

Chester Ismay

Data Science Evangelist, DataRobot

Monarchs that aren't prime ministers

```
SELECT monarch, country
FROM monarchs
EXCEPT
SELECT prime_minister, country
FROM prime_ministers;
```

Let's practice!

JOINING DATA IN SQL

Semi-joins and Antijoins

JOINING DATA IN SQL

Chester Ismay

Data Science Evangelist, DataRobot

Building up to a semi-join

```
SELECT name
FROM states
WHERE indep_year < 1800;</pre>
```

Another step towards the semi-join

```
SELECT president, country, continent
FROM presidents;
```

```
president
                                  continent
                       country
Abdel Fattah el-Sisi | Egypt
                                 | Africa
Marcelo Rebelo de Sousa | Portugal
                                 | Europe
                     | Haiti
Jovenel Moise
                                 | North America
Jose Mujica
            | Uruguay | South America
Ellen Johnson Sirleaf
                    | Liberia
                                 | Africa
Michelle Bachelet
                 | Chile
                                 | South America
Tran Dai Quang
                     | Vietnam
                                 | Asia
```

Finish the semi-join (an intro to subqueries)

```
SELECT president, country, continent
FROM presidents
WHERE country IN
    (SELECT name
    FROM states
    WHERE indep_year < 1800);</pre>
```

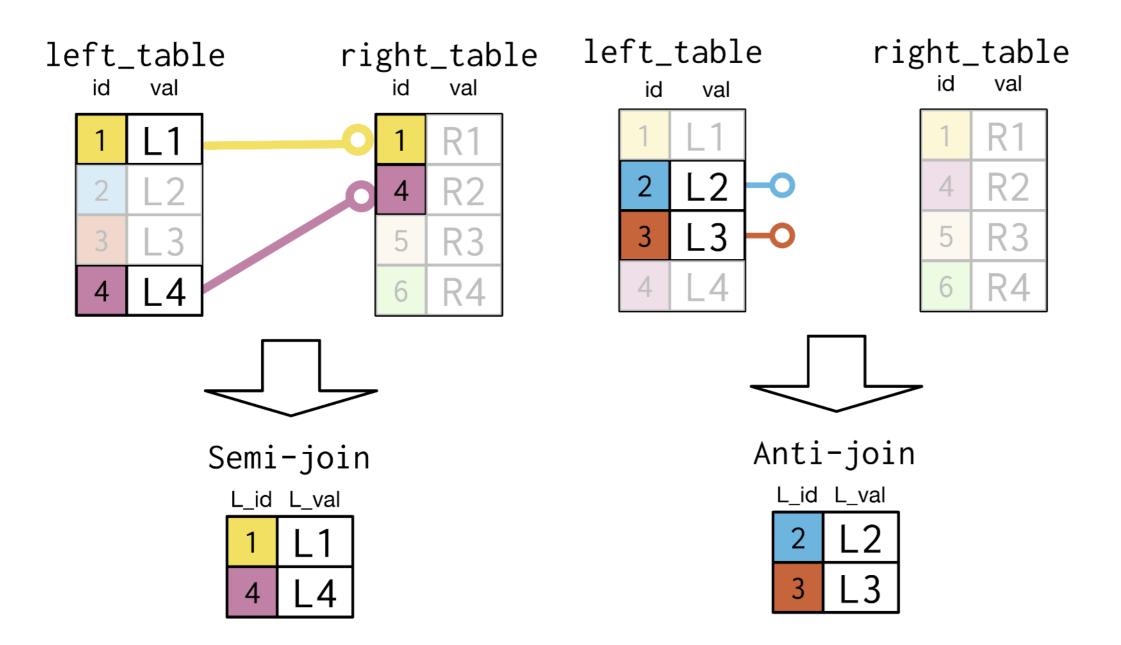

An anti-join

```
SELECT president, country, continent
FROM presidents
WHERE ___ LIKE '___'
AND country ___ IN
    (SELECT name
    FROM states
    WHERE indep_year < 1800);</pre>
```

```
SELECT president, country, continent
FROM presidents
WHERE continent LIKE '%America'
AND country NOT IN
          (SELECT name
          FROM states
          WHERE indep_year < 1800);</pre>
```

The result of the anti-join
